ELECTROTRANS

15th Eurasia urban electric transport exhibition & congress

Welcome to visit ElectroTrans 2026 – 15th international exhibition, devoted to innovative technologies for electric modes of public transport – subway, commuter train, tram, trolleybus, electric bus and various types of small electric mobility – e-scooters, e-bikes, etc. The exhibition will take place in Moscow, Russian Federation on June 9-11 2026. It is held as a part of Russian Urban Mobility Week – a set of exhibitions and conferences targeted to develop urban mobility. It is visited by 3200+ professionals from over 1000+ organizations – authorities, operators, universities, innovative startups, suppliers and the industry.

Welcoming words*

Sergey Moscvichev, Head of Transport Committee of State Duma (Parliament) (<http://duma.gov.ru>)
"Safe, high-quality and environmentally friendly passenger transport is one of the key components of the successful development of the national transport system of Russia. I am sure ElectroTrans exhibitors will be discussing innovative solutions and will find new business partners."

Pavel Zavalny, Chairman of the State Duma Committee for Energy (<http://duma.gov.ru>)
"The development of environmentally friendly transport is one of the priorities of the state. A big role in this issue is assigned to the international exhibition ElectroTrans..."

Maxim Likutov, Deputy Mayor of Moscow, Head of the Transport Department of Moscow Administration (www.mos.ru/dt)
"The transport of Moscow is interested in developing innovative solutions in the field of environmentally friendly public transport. ElectroTrans gives us the opportunity to evaluate the advanced technologies in this sphere."

Denis Minkin, President of MAP GET electric transport association, St.Petersburg GUP Gorelectrotrans CEO (www.mapget.ru)
"ElectroTrans is a recognized international event, gathering experts in the field of urban environmentally friendly electric transport and metro from Russia and foreign countries."

Victor Kozlovsky, Moscow Subway Head (www.mosmetro.ru)
"ElectroTrans is held to discuss the prospects for the development of environmentally friendly transport in our country, it is to face innovations and advanced technical solutions, it creates favorable conditions for the exchange of experts."

Andrey Maximov, the Union of Russian Cities CEO (www.urc.ru)
"Russian Urban Mobility Week gives our cities the opportunity to get acquainted with the advanced transport engineering that the municipal authorities could use in carrying out their transport reforms."

* - official welcoming words for 2024 exhibition

Dmitry Golovin, Executive Director of International Metro Association (www.asmetro.ru):
"ElectroTrans exhibition is a well-known international event. It is an important part of the communication field for subways, industry and scientific organizations."

Igor Rosenberg – Deputy Rector of RUT MIIT University (www.miiit.ru)
"The state, science and business are key actors in the creation of national innovation systems, and the exhibition and its business program are aimed at establishing a productive dialogue between participants."

Eugeny Kozin, St.Petersburg Subway Head (www.metro.spb.ru)
"The exhibition showcases products and technologies for subway and city electric transport. The forum is organized with a support of industrial and transport associations, domestic manufacturers and we see this is positive for our sector."

Nikolay Asaul, GUP Mosgortrans CEO (www.mosgortrans.ru)
"ElectroTrans is the only specialized exhibition in Russia dedicated to innovative technologies for urban electric transport. It is an effective platform for business communications."

Conference program

- All-Russian council devoted to developing of electric transport and financing of new projects
- Conference «Power efficiency of electric transport in the cities»
- Conference «Ensuring environmental safety of vehicles: new challenges, problems and solutions» (organizers: Ministry of Transport of the Russian Federation, JSC NIIAT)
- Conference «Trams and electric buses manufacturing in RF»
- Conference «Ticketing technologies and counting systems»
- Panel discussion «Cost reduction in the maintenance and repair of passenger electric rolling stock and passenger cars» (metro, tram, trolleybus, urban and suburban railway communication)
- Panel discussion «Bus transportation powered by alternative fuels»
- Panel discussion «Lighting for subways and passenger transport infrastructure»
- Panel discussion «Fleet management of passenger transport enterprise: new technologies to improve efficiency»
- Panel discussion «The system of advanced training of engineering and technical staff. Social and personnel issues for public transport operators»
- Panel discussion «How to improve the quality and safety of passenger transportation. Information services for the passengers»
- Panel discussion «Construction and modernization of tram rail ways in various climate conditions»
- MA «Metro» panel discussion «Information security for subways»
- Technical tours to Moscow transport system facilities
- Green Light contest for innovative technologies

Statistics

ElectroTrans, trade fairs are visited by over 3500 experts from about 1000+ organizations.

	Status of the exhibitors	Status of the visitors
Experts	30%	20%
Management	50%	40%
Senior management	20%	35%

	Geography of the exhibitors	Geography of the visitors
CIS	5%	5%
Abroad	15%	2%
RF regions	35%	28%
Moscow region	45%	65%

Electronica Transport

19th International Electronica-Transport 2026 exhibition will be held in Moscow 9-11 June 2026. It showcases IT solutions for public transport – traffic control systems, fleet control technologies, transport automatics, testing and diagnostic, signaling and communication systems, information and payment collection systems, online drivers diagnostic, soft, components for on-board and embedded systems.

www.e-transport.ru

CityBus

9th International CityBus-2026 expo will take place 9-11 June 2026 and feature bus technologies for Russian urban and suburban transport. CityBus exhibition is targeted at professionals from municipal and private transport companies, as well as city authorities.

Russian electric urban transport key figures

Subway took about **20%** of **18.7 bln** annual public transport rides (in Moscow – **65%** of passenger flow).

In 2025 it was bought **250** subway carriages.

Subway stations: **269** in Moscow, **69** in St.Petersburg, **29** in Minsk, **15** in Nizhniy Novgorod, **13** in Novosibirsk, **11** in Kazan, **10** in Samara, **9** in Ekaterinburg.

Leading tram, electrobus and trolleybus manufacturers: **PK Transport Systems, UKVZ, Uraltrans-mash, UTZ, Stroytrans, GAZ Group, KAMAZ Group, Volgabus, Sinara, BKM Holding.**

Russian cities **with tram: 61**, **with trolleybus: 95.**

Russian urban electric transport fleet: commuter trains carriages – **15000**, subway carriages – **7400**, trams – **8400**, trolleybus – **5700.**

Moscow is the only Russian city started the program of replacing diesel bus and trolleybus by **electrobus**. By **2030** Moscow will stop purchase diesel buses.

In 2024 ElectroTrans exhibition and other exhibitions of **Russian Urban Mobility Week** were visited by **3100 professionals** from 38 regions of Russia + Belarus, Turkey, China, Iran, Kazakhstan, Azerbaijan, Armenia, India, Yemen

Electric cars in Russia: **139 000+**, charging stations: **8500+.**

Participation terms and contacts

Tram or electric bus exhibiting – Euro 800
12 m² turnkey booth – Euro 3350
Non-present participation – Euro 250
The exhibition and the program are free
for professional visitors.
